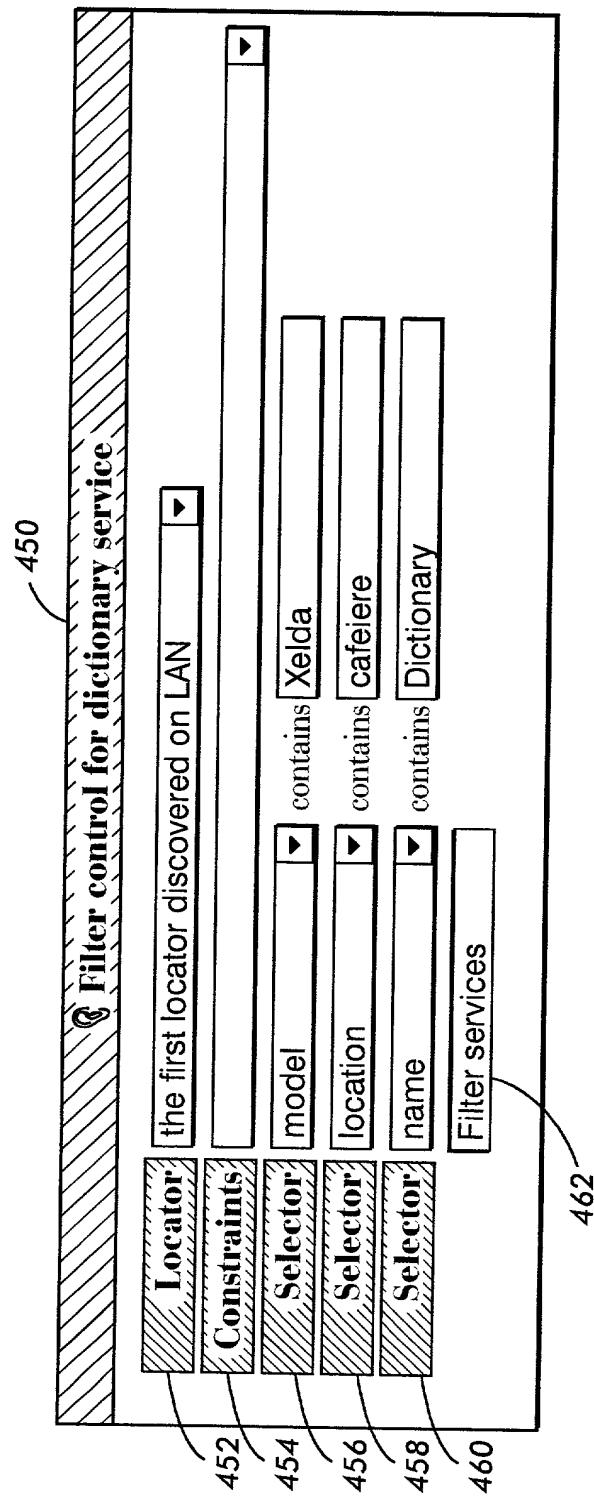

FIG. 9

FIG. 10

Service parameters description (Xelda instance of Dictionary)		
Name	Description	Type
cmd	the command the service can Handle 0 lookup in a dictionary each word of a text 1 hyperlinks each word of a text towards its translation [input-url] [input-text] [output-language] [input-language] [output-format]	Integer
input-url	The url to parse and lookup	String
input-text	The text to parse and lookup	String
input-language	The language in entry, default is english	String
output-language	The language in output, default is english	String
output-format	The output format, only for lookup command default is html, can be ascii	String

11/16

Service properties (Dictionary)	
Name	Dictionary
Vendor	Alain (drums, not guitar) Franciosa (Alain.Franciosa@xrce.xerox.com)
Manufacturer	Xerox
Model	Xelda
SerialNumber	\$Id: XeldaCoreImpl.java,v 1.2 2001/09/28 12:19:19 jacquin Exp \$
Version	\$Id: XeldaDictionaryTask.java,v 1.1 2001/09/22 15:15:54 jacquin Exp \$
Address	XRCE/ATS 38240, Meylan France
Location	cerise.grenoble.xrce.xerox.com Third Floor Castle
Domain	dictionary
Domain	dictionary, linguistics, xelda, english, french, italian, portuguese, german
Comment	The dictionary is able to provide you word definitions in the same or different languages. french and english languages are able to interoprate with all the others and have to be considered in one of the input-language or output-language BE CAREFUL, very expensive service when too many words in input
Interact with Xelda	

FIG. 11

Control panel for summarizer service(s)	
View the current input.	the command the service can Handle no choice. Only 0 cmd to summarize (input-file input-text input-url) [language]
Command	<p>the command the service can Handle no choice. Only 0 cmd to summarize (input-file input-text input-url) [language]</p> <p>If interaction based on current inputs sampled results are the generated queries for check before applying them all</p>
language	<p>The language of the source text can be within english, the default value french</p> <p>spanish german italian portuguese</p>
input-text	<p>The source text if a string</p>
input-url	<p>The source text if a url</p>
input-file	<p>The source text if a file</p>

FIG. 12

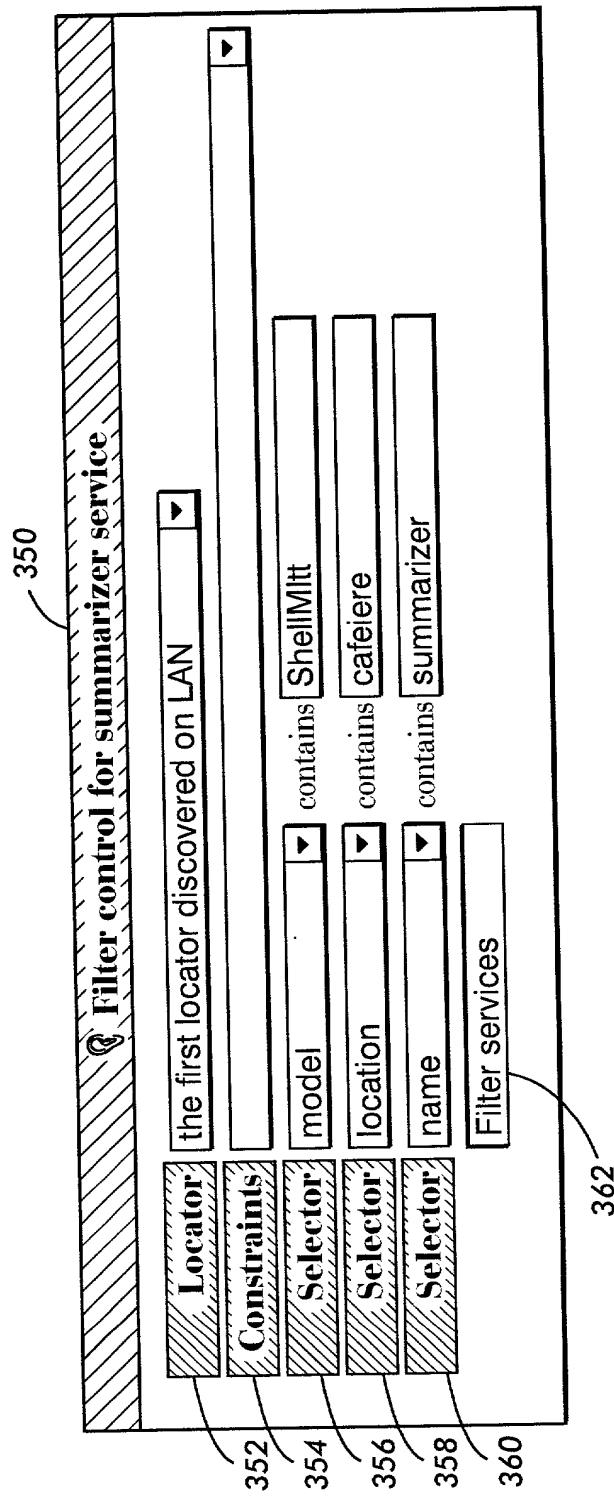

FIG. 13

<b>Service properties (Document Summarizer)</b>	
<b>Name</b>	Summarizer
<b>Vendor</b>	Greg (Gregory.Grefenstette@xrce.xerox.com)
<b>Manufacturer</b>	Xerox
<b>Model</b>	ShellMitt
<b>SerialNumber</b>	\$Id: ShellMittCoreImpl.java,v 1.4 2001/07/24 13:22:19 jacquin Exp \$
<b>Version</b>	\$Id: ShellMittSummarizerTask.java,v 1.3 2001/02/09 14:57:50 jacquin Exp \$
<b>Address</b>	XRCE/ATS 38240, Meylan France
<b>Domain</b>	linguistics
<b>Domain</b>	english, french, german, spanish, italian, portuguese
<b>Location</b>	cerise.grenoble.xrce.xerox.com Third Floor Castle
<b>Comment</b>	The ShellMitt instance of the Summarizer service over JSF can handle a text, an url or a file. for a file, be careful: the path should be valid on cafeiere.grenoble.xrce.xerox.com machine for the jacquin user.
<b>Interact with ShellMitt</b>	

FIG. 14
